CITY OF PITTSBURGH MUNICIPAL PENSION FUND
ATTACHMENT TO SCHEDULE C, SECTION III, ACT 205 FORM FOR 2003

Documentation required for certain actuarial assumptions by Section 203.3 of the ACT 205 regulations regarding the Range of Economic Actuarial Assumptions.

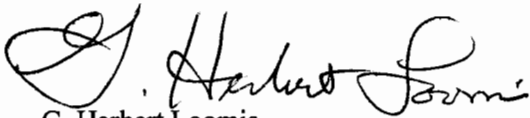

This actuarial report utilizes assumptions regarding salary projections and interest which, taken together, fall outside of the range prescribed in paragraph (b)(3) of Section 203.3 of the regulations. The guidelines provide that the salary projection rate should be not more than 3 percent less than the actuarial assumption as to interest. For this Plan, the interest rate assumed is 8.75 percent per annum and the salary increase assumption is 4.00 percent per annum, a difference of 4.75 percent.

For 2003, we believe that using an interest rate and salary increase assumption within the guidelines would have been inappropriate, and that using our particular choice of actuarial assumptions was appropriate because of the reasons described below:

1. The 2001 experience investigation concluded that for the prior four years the average annual increase in salaries to continuing participants of 2.8 percent per annum. During the twelve years ending 2000, the increases averaged 3.4 percent per annum. As of the valuation date, the outlook appeared to indicate that it was reasonable for increases to continue at this magnitude for at least the near term.
2. The average investment return for the period from January 1, 1985 through December 31, 2000 was 9.9 percent. Thus, on average, the fund exceeded the valuation rate of return over a 16-year period, even though that period included some years (such as 1994 and 2000) in which the markets were down. Reducing the assumption to 7.0 percent (which could put the difference with the salary scale at 3 percent, and not require specific documentation) would have understated long-term expectations of interest earnings. The City's investment policies appear to support the reasonableness of the 8.75 percent assumption.

Because this difference is greater than both the regulation and difference most commonly found in pension valuations this situation is being carefully and regularly monitored to assure the differential continues to be justified.
